CRITICAL INFORMATION SUMMARY

BROADBAND SPEEDS

ADSL can provide download speeds up to a maximum of 20Mbps to eligible customers in selected areas with upgraded exchanges and up to 8Mbps in many other areas but average speeds will be lower.

Actual speeds you will receive will vary due to a number of factors such as your distance from an exchange, the network connecting the exchange, your equipment and software and internet traffic

Download speeds on devices connected via a Wi-Fi modem or network extender may be slower than on devices connected by Ethernet cable.
